

THE BAG CONTAINS

- 1. Start number.** The start number should be worn, and clearly visible, when you enter the start pen. The start number may not be removed during the race.
- 2. Chip with velcro strap.** Thread one velcro strap through the chip and attach to your right ankle. The chip is linked to your start number so make sure you don't mix up your chip with anyone else's. No chip = no time keeping. Do not expose the chip to cold temperatures before the race. The chip must be returned after the finish; any participant who doesn't return their chip will be charged 300 SEK.
- 3. ID-tags (stickers).** Fill in the team member's information and attach to the inside of the start number.
- 4. Bag labels.** Participants on sections 1 and 2 should attach their bag label to the **plastic sack** used for coveralls. Seal the bag by tying it shut. When sending luggage via Vasaloppet transports, remember to protect the contents from getting wet by first putting your clothes in a plastic bag before packing them in the plastic sack. You can choose to check a box to give the contents to charity.
